k. (U) ED 40-1, Subject: Intelligence - Missions, and Responsibilities (SECRET/NOPORN).

l. (U) ED 40-7, Subject: Intelligence - Exploitation of Imagery (SECRET).

n. (U) CINCLANT/USCINCEUR Memorandum of Understanding Governing Operation of FICEURLANT (U).

o. (U) USEUCOM Emergency Action Procedures, Volume II, Alert Procedures (SECRET).

p. (U) DIA Consolidated Instructions for Airborne Imagery Reconnaissance Programs: Essential Elements of Information (SECRET).

### 3. (U) POLICY.

a. (U) USCINCEUR exercises operational command of component and other assigned forces and exercises control over intelligence activities of the Command in accordance with references a-c. USCINCEUR is responsible for establishing plans, policies and overall requirements for the intelligence activities of the command, ensuring they are in consonance with national and DOD intelligence directives per references b, c, e, and f. This directive is issued pursuant to this responsibility and to authority under reference c to establish and operate activities to perform intelligence functions of common concern. This directive has been coordinated with HQ SAC and HQ USLANTCOM.

### 4. (U) DEFINITIONS.

a. (U) AFSSO IRC - Air Force Special Security Office, Intelligence Research Center. Defense Special Security Communications System message address for the European Special Activities Facility (ESAF) and 497 RTG.

b. (U) CCF - Collection Coordination Facility, DIA/DC-1.

d. (U) CMO - HQ USEUCOM ECJ2 Collection Division, <sup>European</sup> Collection Management Office.

g. (U) DEFCON - Defense Readiness Condition. Indicates level of alert and associated actions for U.S. forces. See reference o.

h. (U) DOD - Department of Defense.

i. (U) EEI - Essential Elements of Information. The critical items of information regarding the enemy and the environment needed by the commander by a particular time, to relate with other available information and intelligence in order to assist in reaching a logical decision. It includes exploitation guidance provided to imagery interpreters' regarding the type of information required and the level of detail to be reported.

j. (U) ESAF - European Special Activities Facility. See reference 1.

k. (U) FICEURLANT - Fleet Intelligence Center Europe and Atlantic located at Norfolk, Va. See reference n.

l. (U) HOTPHOTOREP - Hot Photographic Report. See references d and f.

m. (U) IPIR - Initial Photographic Interpretation Report.

q. (U) RTG - Reconnaissance Technical Group.

r. (U) WATCHCON - Watch Condition. See reference h.

5. (U) GENERAL.

(1) (U) Support is provided for intelligence production and support programs in response to CINCUSNAVEUR tasking and to USCINCEUR validated command-wide requirements tasked to CINCUSNAVEUR. FICEURLANT is tasked to accomplish production requirements in accordance with appropriate Department of Defense and unified command directives and maintains USCINCEUR required data bases.

(4) (U) Duplicate exploitation and reporting will be held to a minimum consistent with requirements of operational commanders. USEUCOM CMO will develop a delegated exploitation and reporting plan in coordination with component and other supported commands and agencies to ensure effective and efficient support to reporting and information requirements of commanders throughout the theater. Task assignments under this plan will be fully consistent with the primary mission needs of the commander supported by the asset concerned.

6. (U) RESPONSIBILITIES/PROCEDURES. The operational management procedures established herein are applicable to all imagery systems and associated processing and exploitation activities employed within the United States European Command Theater. These procedures provide a coherent management structure for the responsive exploitation and dissemination of imagery information and intelligence derived from such systems to support execution of the United States European Command mission through peace, crisis and war.

a. (U) Exploitation and Dissemination Guidance.

(1) (U) Policies for the exploitation of imagery and dissemination of the resulting intelligence have been established by the Department of Defense and Joint Chiefs of Staff for implementation at all levels (references d-i and p). Where applicable, policies have been established by the Director of Central Intelligence for Department of Defense assets performing functions under national intelligence purview (reference j). These policies, binding on all USEUCOM elements, are designed to insure the timely exchange of intelligence and updating of data bases at all levels to provide a common intelligence basis to support force posture, force allocation, military capabilities planning and other decisions by tactical commanders and key decision makers. The need for a common basis of understanding about the threat is especially important where decisions at an adjacent or different level of command can affect the operations and/or capabilities at other levels.

(2) (U) In addition to DoD and JCS policies, the United States is signatory to NATO Standardization Agreements (STANAGS) which specify standard procedures and formats for use by NATO forces.

(a) (U) USEUCOM forces will utilize STANAG procedures when chopped to NATO control.

(b) (U) USEUCOM forces also providing reports to NATO elements in peacetime may use STANAG 3377 reporting formats for such reporting in addition to specified U.S. reports (references d, f, and j).

(c) (U) U.S. reporting formats and procedures are mandatory for support to U.S. contingency and other operations or when reporting under provisions of reference j.

(b) (U) This condition may be declared separately using the format at appendix one by HQ USEUCOM, or by HQ USAFE for 497 RTG/ESAF, by CINCUSNAVEUR for FICEURLANT, and by USEUCOM components and attached or supporting forces for other assigned intelligence activities.

6 (U) FICEURLANT tasking procedures normally will be IAW CINCLANT/USCINCEUR MOU governing operations of FICEURLANT.

7 (U) Flash and CRITIC reporting procedures apply IAW DIAM 58-13 (Formerly DIAM 58-2, Vol II, Part Nine, Chapter 1).

(b) (U) Declaration of this condition requires the following minimal implementing actions by all imagery intelligence organizations conducting first phase exploitation unless only specified organizations are tasked in the declaration message:

3 (U) Flash and CRITIC reporting procedures will be utilized when applicable conditions are met.

(3) (U) Condition CHARLIE. Normal operating procedures.

c. (U) DDS BACKUP PROCEDURES.

(a) (U) HQ USEUCOM will:

2 (U) Insure that a current list of essential standing first-phase, direct support exploitation requirements and addressees are provided to DIA in accordance with DIA guidance. A similar list will be provided to FICEURLANT for its area of responsibility. These requirements and addressees together with existing ad hoc requirements will be reviewed, updated and prioritized immediately prior to backup activation and provided to DIA/FICEURLANT via DIA established message format(s) (appendices 2 and 3).

3 (U) Maintain a twenty-four hour Director of Intelligence point-of-contact, and issue such additional guidance as may be necessary to insure responsive activation of backup capabilities.

(a) (U) FICEURLANT will:

(b) (U) 497 RTG:

(5) (U) CINCUSAREUR, CINCUSNAVEUR, CINCUSAFE, and commanders of forces assigned or attached to USEUCOM or being supported by USEUCOM will insure that:

(a) (U) Collection and exploitation requirements entailing DDS support are forwarded to HQ USEUCOM (SSO USEUCOM //ECJ2-C(CMO)//) for validation and are addressed for information to SSO DIA //DC-1(CCF)/DC-5C/DB-5F//, to AFSSO USAFE //INRM/497 RTG/ESAF//, AFSSO IRC //INIOE/ESAF// and for requirements in the Barents, Baltic, Black, and Mediterranean seas littorals and Middle East, to FICEURLANT and CINCUSNAVEUR //N-21//.

7. (U) DISTRIBUTION. Dissemination of this directive is controlled by the originator. Requests for additional distribution should be directed to HQ USEUCOM/ECJ2-C.
